

INITIAL ASSESSMENT FORM

Name :	Hospital :
Registration No. :	
Father Name :	Obstetrician :

Antenatal Details

Mother's age at conception (years) : _____ Mother's Blood Group : _____

Parity*: _____ Gravida _____, Para _____, Live Born _____, Abortions _____, Death _____

Conception : Spontaneous / Artificial _____ Consanguinity : Yes / No

LMP : _____ EDD* : _____ Tetanus : Yes / No

Scans*

• EDD : _____ Any malformations : _____

• Liquor : _____ Dopplers : _____

Any H/O* :

• PIH : Yes / No. GDM : Yes / No APH : Yes / No

• UTI or any febrile illness : Yes / No PPRM : Yes / No

If delivered preterm* :

• Reason for prematurity : _____

• Antenatal steroids : Yes / No Magnesium sulphate : Yes / No

• Antibiotics for PPRM : Yes / No Delayed cord clamping : Yes / No

Mode of delivery : NVD / LSCS / Vacuum / Forceps

Indication for LSCS :

BABY DETAILS Date of birth : _____ Time of birth : _____ Sex : _____ Gestation : _____ Weight : _____ Length : _____ HC : _____ SGA / AGA / LGA _____	Baby's Foot Print
Resuscitation details Amniotic fluid : Clear / Meconium stained / Foul smell Cried immediately after birth* : Yes / No Resuscitation* : Yes / No (PPV, Intubation, Chest Compressions) APGAR scores at 1min, 5min, 10min of life – _____, _____, _____	

General & Systemic Examination

Facies : _____ Colour : _____ Posture : _____ Skin : _____ Head : _____ Anterior fontanelle : _____ Eyes : _____ Red reflex : _____ Ears : _____ Mouth : _____ Tongue : _____ Palate : _____ Respiration : _____ Air entry : _____	Heart rate : _____ Heart sounds : _____ Any murmurs : _____ Liver : _____ Spleen : _____ Any mass : _____ Umbilicus : _____ Anus : _____ Genitalia : _____ Spine : _____ Extremities : _____ Hip examination : _____ Any special features: _____ Congenital anomalies: _____

KOMPALLY

Demographic Details

Name of the baby* : _____

Admission No. : _____

Fathers Name : _____

Address : _____

Sex* : Male / Female / Ambiguous

Date of birth* : _____ Time of birth* : _____ Age* : _____

Date of admission* : _____

Antenatal details : _____

Mother's age at conception (years) : _____

Parity* : Gravida _____, Para _____, Live Born _____, Abortions _____, Death _____

Conception : Spontaneous / Artificial

Consanguinity : Yes / No

LMP : _____

EDD* : _____

Booked at* : _____

Tetanus : Yes / No

Scans* :

• EDD : _____

• Any malformations : _____

• Liquor : _____

• Dopplers : _____

Any H/O*

• PIH : Yes / No

• GDM : Yes / No

• APH : Yes / No

• UTI or any febrile illness : Yes / No

• PPRM : Yes / No

If delivered preterm*

• Reason for prematurity : _____

• Antenatal steroids : Yes / No

• Magnesium sulphate : Yes / No

• Antibiotics for PPRM : Yes / No

Intrapartum Details

Mode of delivery* : NVD / Forceps / Vacuum / LSCS

If LSCS (reason for LSCS) : _____

Amniotic fluid : Clear / Meconium stained / Foul smell

Cried immediately after birth* : Yes / No

Resuscitation* : Yes / No (PPV, Intubation, Chest Compressions)

APGAR scores at 1min, 5min, 10min of life : _____, _____, _____

Gestation at birth* : _____ weeks

Presenting Complaints

- | | |
|--|--|
| 1. Temperature instability | 2. Respiratory distress, gasping or apnoea |
| 3. Bluish discoloration of peripheries | 4. Decreased or dull activity |
| 5. Abnormal movements / seizures | 6. Feeding difficulties |
| 7. Poor weight gain | 8. Yellowish discolouration of body and eyes |
| 9. Decreased urine output | 10. Abdominal distension, abnormal stool pattern |
| 11. Vomiting | 12. Any other complaints |

Birth Anthropometry

Weight(grams)* : _____, _____ (Centiles on Fenton)

Length(cm)* : _____, _____ (Centiles on Fenton)

Head circumference(cm)* : _____, _____ (Centiles on Fenton)

Gestational age assessment (New Ballard Score)

Physical score : _____

Neurological score : _____

Total score : _____

Gestational age : _____

VITALS

Temperature : _____

Saturation : _____

Heart rate : _____

NIBP : _____

Respiratory rate : _____

Capillary Refill Time : _____

General Examination (Pallor / Icterus / Cyanosis / Edema)

Facies :	Palate :
Color :	Neck :
Posture :	Chest wall abnormalities :
Skin :	Umbilicus :
Head :	Anus :
Anterior fontanelle :	Genitalia :
Eyes :	Spine :
Red reflex :	Extremities :
Ears :	Hip examination :
Mouth :	Any special features :
Tongue :	Congenital anomalies :

Systemic Examination
